

CREDIT CARD DEFAULT PREDICA-TION

Wireframe documentation

D Giridhar

- 1. The first page displays the pop up window where the user has to provide specific details such as Gender, Repayment status, Bill amount etc.
- All the information will be used to predict the results.

2. Incase you miss out one input the webpage will alert you for the same.

- 2. After entering all the data we will get the predictions at the bottom page, i.e if the borrower will default or not.
- In this case the Borrower will not be a Defaulter in next month.
